

Writeup for Project 2 part 2

Make Prefix: Had a bit of a problem with “or” statements, but aside from that it was pretty simple. Used loops to make it work well and consistently. Pretty similar to part 1 of the project but I tweaked quite a bit to make it work better, by the end most of it was changed. One of the more difficult sections but was relatively simple

Make Suffix: Almost identical to the last project but in a function. No issues

Make Phone Number: Very simple. No issues.

Main: Made use of loops, worked pretty well. Good practice in using functions overall. Works as intended. No issues.

The only resources I consulted was the assignments given to us and the lab session.
